San Jose del Cabo, East Cape, La Paz

**MEXICO**

## 2010-11 Baja California Packages

Our newest offering is what we're calling the "Mini" Long-Range Baja Trip... without the countless hours motoring between fishing grounds. NO OTHER CHARTER BUSINESS offers this package. Rather than boarding in San Diego and motoring for three days and nights to get to the fish, our clients simply fly to Cabo or La Paz and are fishing the next morning on the hallowed grounds of the East Cape... the *ENTIRE* East Cape.

We fell into this niche after a surgeon friend/client of ours from Anchorage, Alaska flew down here in early December for a solid week of fishing with his 12 year-old son. They wanted something "different" so we brainstormed the inaugural "New" Long-Range Baja Trip and they flew down to Cabo. The next morning we began our journey fishing the entire East Cape, foot by foot, all the way back to La Paz (150 miles).

Each of the nights during the trip we stay two persons to a room in a different, classic East Cape hotel such as the Hotel Punta Colorada, BuenaVista or Rancho Leonero among others for a spectacular dinner (your own fresh caught fish, if desired), a monster breakfast and a box lunch to go, and then on to the next hawg hole.

These trips are totally customizable, on a space available basis and on the following pages you will see our most popular package described in more detail.

The fact of the matter is... these voyages allow us to fish where the fish are. Each of the fishing grounds you see on the map above is well-known for certain species at certain times of the year, and we're there.

### 5 Day / 4 Night "ENTIRE East Cape Special" – \$1295 per person (4 pp)

*Note: For simplicity, this brochure will describe the SJD to LAP version of the special.*

**Day 1:** Arrive either Los Cabos (SJD airport) or La Paz (LAP airport) with personal pick up and transfer to either our San Jose del Cabo beachfront condominium or La Paz private residence; both include pools and air conditioning.

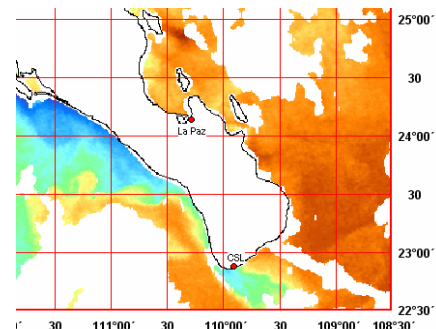

**Night 1:** Enjoy the comfort of your private, beachfront condo in San Jose with three swimming pools to choose from. Dinner is available at several spectacular local restaurants or you can cook-in with your own fully equipped kitchen. The “Mega” supermarket is within walking distance, no need to rent a vehicle or taxi.

**Day 2:** We’ll pick-up and shuttle you to the Marina to board “Little Sister”, our tournament rigged, US owned and operated 32’ Rampage Sportfisher for the first full day fishing where we’ll concentrate on the Gordo Banks outside San Jose del Cabo or further north near Los Frailes or Punta Arena depending upon current fishing conditions.

**Night 2:** Enjoy a fresh prepared local specialty or your own catch-of-the-day created in one of the renowned restaurants of the fishermen’s resorts. A couple of ice-cold Pacifico’s or a bottle of northern Baja’s best wine will help to cool down the chile salsa if you get carried away. The gorgeous rooms in each resort are uniquely appointed and you may even end up under the same roof that housed John Wayne or Bing Crosby in the middle of the 20<sup>th</sup> century.

**Day 3:** Breakfast is served between 6 and 6:30 am before a 7:00 am departure for the trophy fishing grounds nearby. This day will again provide access to trophy water and new fishing grounds where species as varied as the techniques we’ll use to catch them. We’ll focus our efforts according to water temps and success of the “local” fleet the previous day.

**Night 3:** Identical to Night 2... just a different locale/resort. The crew will fillet and stow the days catch while you get cleaned up, filled up and ready for Day 4 at the next fishing ground(s). Order your next day’s to go lunch while at dinner.

**Day 4:** Same scene, different day, different water. We’ll fish both the southern and northern ends of Cerralvo Island (again, depending upon WHERE the fish are) while making our way around the corner into La Paz. Upon arrival, your catch can be vacuum sealed and frozen (in either La Paz or San Jose del Cabo for shipment back home if desired).

**Night 4:** Back at your private residence in El Comitán (La Paz), relax, take a swim in your private pool while the BBQ is churning out your grub. Or, hit one of many excellent restaurants in the neighborhood and later cruise into La Paz to see the action on the Boardwalk “Malecon” and visit one of the dozens of local nightclubs or attractions.

**Day 5:** Sleep in a bit and spend the morning getting organized for your departure. The shuttle to the airport is based on your departure, or... stick around for a few more days!

## Main Target Species

### **Striped Marlin –**

“Stripers” like to hang in water between 70-86 degrees... this works for us because that’s the standard temperature range of our local water. They’re found year-round slow trolling live bait, fast trolling plastics or, our personal favorite, pitching live baits off the bow.

### **Yellowfin Tuna –**

Footballs are available most of the year in water above 70° and best when over 74°. The “cows” come home from about May thru December with a new Mexican record of over 380# boated on the Banks last year. Jigs, live bait, and feather all work... just depends on what mood they’re in that day.

### **Dorado –**

Or dolphin or mahi mahi, depending upon which part of the ocean you’re from, are VERY plentiful. Sometimes even too much so as we get intercepted while trying to get baits down to billfish or big tuna. However, their aerial acrobatics and sweetness on the dinner plate make up for being occasional pests!

### **Wahoo –**

As another fish that prefers the 70-86° range, we’re blessed with these gnarly critters pretty much all year. We just hope that they hit the wire leader when we aren’t targeting them. Those big trolling lures are expensive and the wahoo don’t even appreciate their new jewelry after stealing one!

### **Blue & Black Marlin –**

We released our first Blue of the season in mid-April last year, although the season usually runs May-December. Free-roamers, the blues and blacks are best fished where bait is most plentiful i.e. around schools of small tuna and other pelagic baitfishes, in areas where seamounts or other subsurface structure creates up wellings and currents, along sharp bottom contours and near temperature breaks.

### **Roosterfish –**

A bizarre member of the Jack family, our Roosters are known for their voraciousness. Most plentiful in Spring and Fall, it’s hard to beat a pissed-off Rooster. As a sidenote, the current IGFA record for Roosterfish is a 114-pounder, caught off La Paz. Come set the *new* record.

### **Additional species include (but not limited to):**

Pacific Sailfish; Amberjack; Pargo (various); Yellowtail; Cabrilla; Grouper; Sierra; Bonita

## Additional Options (create your own package):

- § Extra Day Fishing San Jose del Cabo, Cabo San Lucas or La Paz  
\$750.00 (four persons)
- § Extra Night Cabo or La Paz  
\$75.00 per person, 2 person per room, double occupancy
- § Exploration Day (Snorkeling, Kayak, Whale Watching) via our panga  
\$120.00 per person
- § Off-Road 4-Wheel ATV  
(please inquire via email or call for prices)
